

1st IPCRG Regional Scientific Conference

SRI LANKA

3 - 5 August 2017 Galadhari Hotel, Colombo

For healthcare professionals in primary care, family medicine or the community with a respiratory interest who want to:

- **Debate** the latest evidence on prevention of respiratory disease in low and middle income countries
- **Attend** expert-led workshops on writing conference abstracts and manuscripts for peer review
- **Train** in important techniques such as spirometry and smoking cessation
- **Gain** knowledge about therapeutic effectiveness
- **Test** research ideas and methodology with colleagues
- **Report** an implementation science project
- **Present** a clinical study
- **Learn** how colleagues from other countries manage respiratory disease
- **Compare** ways to organise respiratory care
- **Meet** new people with similar interests

SCOPE: *chronic and infectious respiratory diseases, respiratory symptoms such as cough, wheeze and breathlessness, multi-morbidity including mental health problems and tobacco dependence in low, middle and high income countries, organisation and care*
