Acceptance and practicability of a visual communication tool in smoking cessation counselling: a randomised controlled trial

See here for first use of the Desktop Helper in a research project that concluded among Swiss GPs and patients, both our innovative communication tool and the IPCRG tool were well accepted and both merit further dissemination and application in research.

Acceptance and practicability of a visual communication tool in smoking cessation counselling: a randomised controlled trial
Stefan Neuner-Jehle, Marianne I Knecht, Claudia Stey-Steurer, Oliver Senn.
