

Treating Childhood Asthma

[Back to Treating Patients](#)

An international primary care response to Professor Ulrich Wahn's contention that there be discrete guidelines for managing children with asthma, and that there be more specific research on children

Some questions produced very practical responses. These are arranged by country and by subject

[Responses by country](#)

[Responses by subject](#)

THE QUESTIONS WE ASKED

We developed a set of questions to guide the discussions – [see here](#)

[See here](#) for a fascinating summary of the project that interviewed GPs and patient representatives from around the world about their communication, education and management strategies for children with asthma
